EDUCATION

University of California, San Diego

La Jolla, CA

Bachelor of Science in Data Science, Minor in Cognitive Science

Sep. 2024 – Jun. 2028

- Data Structures, Design, Analysis of Algorithms, Computer Organization, Systems Programming, Data Science in Practice, Machine Learning Algorithms

GPA: 3.8

EXPERIENCE

HDSI Undergraduate Research Scholar

Aug. 2026 – Present

Hahcioğlu Data Science Institute, UC San Diego

La Jolla, CA

- Selected for a competitive undergraduate research program and awarded a **\$2,500 scholarship** to conduct independent data science research with the UC San Diego Library.
- Investigating **LLM-ready information architecture, prompt design, and model customization** to prototype a Library-specific AI assistant grounded in existing digital resources.

DSC 80: Practice and Application of Data Science Tutor

Aug. 2026 – Present

Hahcioğlu Data Science Institute, UC San Diego

La Jolla, CA

- Mentored students across **statistical testing, missing-data analysis, web scraping, feature engineering, and machine learning** through technical office hours and project support.
- Graded programming assignments and projects and developed exam questions assessing statistical reasoning and applied data science skills.

Data Science Research Intern

Jun. 2026 – Present

Scripps Research Digital Trials Center

La Jolla, CA

- Analyzed longitudinal **Fitbit wearable and cognitive data** to investigate associations between sleep health and cognitive aging, presenting findings at a research symposium and contributing to a manuscript for publication.
- Built Python analysis pipelines for data cleaning, cohort construction, and feature extraction; modeled wearable-derived biomarkers and cognitive outcomes using **regression, PCA/sPLS, and mixed-effects models**.

Data Science Intern

Jun. 2025 – Aug. 2025

Southern California Edison

Pomona, CA

- Improved reliability dashboard accuracy by validating outage data and correcting automation errors, contributing **1.24 minutes** toward a 9-minute monthly reduction goal and identifying impacts across **5,703 customers**.
- Developed a Python-based **EPC/DYD parser** to transform raw energy system files into structured pandas DataFrames and automate engineering data retrieval.

PROJECTS

League of Legends 15-Minute Statistical Analysis | *Python / Riot API* | GitHub

- Analyzed **18,472 professional League of Legends matches**, performing data cleaning, feature engineering, and exploratory analysis on early-game performance metrics.
- Built Decision Tree and Random Forest classifiers to predict match outcomes from 15-minute statistics, achieving **74% accuracy** and evaluating model fairness across competitive tiers.

TECHNICAL SKILLS

Languages: Java, Python, HTML/CSS, R, SQL

Tools: DarkTrace, Git, VSCode, MongoDB, React, Node, Express, Tableau, PowerBI, Excel, Google Sheets, REST APIs, JSON

Libraries: Pandas, NumPy, Matplotlib, SeaBorn, Scikit-learn, Requests, PyTorch
