EDUCATION

University of California, San Diego

La Jolla, CA

Bachelor of Science in Data Science, Minor in Cognitive Science

Sep. 2024 – Jun. 2028

- Data Structures, Design, Analysis of Algorithms, Computer Organization, Systems Programming, Data Science in Practice, Machine Learning Algorithms

GPA: 3.8

EXPERIENCE

Data Science Research Intern

Jun. 2026 – Present

Scripps Research Digital Trials Center

La Jolla, CA

- Built **Python data pipelines** to clean and integrate longitudinal Fitbit wearable and cognitive datasets, performing cohort construction, feature extraction, and participant-level data management.
- Developed reproducible analysis workflows for wearable-derived biomarkers and cognitive outcomes using **Pandas**, **NumPy**, and **statistical modeling**.

Product Manager

Nov. 2024 – Present

Triton Software Engineering

La Jolla, CA

- Collaborated with developers and designers on full-stack web applications, translating client requirements into technical specifications and implementation priorities.
- Contributed to the development of the SpayLA website using the **MERN stack**, participating in implementation, integration, and the software development lifecycle.

Data Science Intern

Jun. 2025 – Aug. 2025

Southern California Edison

Pomona, CA

- Developed a Python-based **EPC/DYD parser** to transform raw energy system files into structured pandas DataFrames, automating manual engineering data review and retrieval.
- Debugged data and automation discrepancies in SCE's reliability reporting pipeline, improving the accuracy of its most-viewed **Power BI** dashboard.

Information Technology Intern

Jun. 2024 – Aug. 2024

Port of Long Beach

Long Beach, CA

- Developed a **Python tool** to assess infrastructure impact during a global failure event by identifying offline devices and affected employees to support incident response.
- Evaluated **Darktrace cybersecurity software** and presented technical findings and recommendations to the Cybersecurity team and Assistant Director.

PROJECTS

League of Legends 15-Minute Statistical Analysis | *Python / Riot API* | GitHub

- Built an end-to-end Python workflow to clean, transform, and engineer features from **18,472 professional League of Legends matches**.
- Developed Decision Tree and Random Forest classifiers to predict match outcomes from 15-minute statistics, achieving **74% accuracy**.

TECHNICAL SKILLS

Languages: Java, Python, HTML/CSS, R, SQL

Tools: DarkTrace, Git, VSCode, MongoDB, React, Node, Express, Tableau, PowerBI, Excel, Google Sheets, REST APIs, JSON

Libraries: Pandas, NumPy, Matplotlib, SeaBorn, Scikit-learn, Requests, PyTorch
