EDUCATION

University of California, San Diego

La Jolla, CA

Bachelor of Science in Data Science, Minor in Cognitive Science

Sep. 2024 – Jun. 2028

- Data Structures, Design, Analysis of Algorithms, Computer Organization, Systems Programming, Data Science in Practice, Machine Learning Algorithms

GPA: 3.8

EXPERIENCE

Data Science Research Intern

Jun. 2026 – Present

Scripps Research Digital Trials Center

La Jolla, CA

- Investigated the relationship between sleep health and cognitive aging in older women using longitudinal **Fitbit wearable** and behavioral data; developed a manuscript-style scientific report and presented findings at a research symposium with the goal of publication.
- Processed and analyzed large-scale **Fitbit sleep datasets** in Python, performing data cleaning, cohort construction, sleep feature extraction, and longitudinal participant data management.
- Conducted statistical analyses of wearable-derived biomarkers and cognitive outcomes using **regression models, PCA/sPLS-based feature reduction, and longitudinal mixed-effects modeling**.
- Integrated wearable sensor data with cognitive assessments including **Stroop, Trail Making, PASAT, reaction time, and tapping tasks** to develop composite cognitive and sleep measures.

Data Science Intern

Jun. 2025 – Aug. 2025

Southern California Edison

Pomona, CA

- Improved reliability dashboard accuracy (SCE's most-viewed **Power BI** tool) by validating outage records, retracing discrepancies, and correcting automation errors — directly saving **1.24** minutes of the monthly 9-minute reduction goal (**6.58M CMI and 5,703 customers impacted**)
- Developed a Python-based **EPC/DYD parser** that automated manual data review by converting raw energy system files into structured pandas DataFrames; created a lookup function to instantly retrieve key data fields, saving engineering teams significant time and reducing manual error.
- Collaborated with cross-functional engineering and reliability teams to integrate findings into operational practices, supporting company-wide goals of improving outage response and system resilience.

Information Technology Intern

Jun. 2024 – Aug. 2024

Port of Long Beach

Long Beach, CA

- Conducted in-depth research on the Port's use of **Darktrace cybersecurity software**; presented findings to the Cybersecurity team and Assistant Director; constructed a formal report on a requested potential software
- **Developed a Python tool** to assess infrastructure impact from a global failure event, tracking offline devices and identifying affected employees to support **incident response**.

PROJECTS

Predicting Alzheimer's Risk Using Socioeconomic and Mental Health Data | *RStudio*

Jul. 2023

- Applied machine learning methods to investigate predictors associated with Alzheimer's disease risk using socioeconomic and mental health variables.
- Compared predictive models including **k-nearest neighbors (KNN)**, **random forest**, and **Naive Bayes**, with KNN achieving **82.1%** accuracy.
- Analyzed the UCI Alzheimer's dataset to identify influential features associated with prediction performance, including depression, aggression, and education level.

TECHNICAL SKILLS

Languages: Java, Python, HTML/CSS, R, SQL

Tools: DarkTrace, Git, VSCode, MongoDB, React, Node, Express, Tableau, PowerBI, Excel, Google Sheets, REST APIs, JSON

Libraries: Pandas, NumPy, Matplotlib, SeaBorn, Scikit-learn, Requests, PyTorch
